We are contractually obliged to ensure that any outcome of the Research or a Research Project or details of the progress of the Research or of any Research Project are prepared and submitted for publication in a suitable peer-reviewed journal as soon as is appropriate, and in any event no later than one year after the conclusion of the Research.

Any publication of or resulting from research carried out under this Contract shall acknowledge the Authority’s financial support and carry the NIHR disclaimer.

Publications
All publications and outputs that have an author who is affiliated to the BRC (either directly funded, supported by or using BRC-funded/supported facilities for their work) must acknowledge the BRC in author affiliations, funding and by a disclaimer. If acknowledgements are omitted, this means your publication will not be included as an output in the returns to the NIHR which are part of the contractual reporting process. If in doubt, please contact the BRC Project Support Officer, Linda Briscoe l.a.briscoe@bham.ac.uk for advice. Please email the final draft of your publication to Linda so that she can check the acknowledgements prior to submission. Please note that the NIHR does not support animal research so publications that are purely animal based should not acknowledge the NIHR. If your publication or other output is likely to generate any publicity / press release you must alert Linda as soon as possible and at least 28 days before publication so that we can advise NIHR.

Author affiliations:
There is a tool on the BRC website (shown below) which can assist you with the correct acknowledgement of the BRC. This can be found at https://www.birminghambrc.nihr.ac.uk/publication-tool/. It is relatively simple to work through and the results can be cut and pasted into your publication.
A sample result based solely on an NIHR affiliation is shown below:

**Author affiliations**

Please include all the following author and related affiliations:

Briscoe, LA\textsuperscript{1, 2, 3}

\textsuperscript{1} NIHR Birmingham Biomedical Research Centre, University Hospitals Birmingham NHS Foundation Trust and University of Birmingham, UK
\textsuperscript{2} University Hospitals Birmingham NHS Foundation Trust, UK
\textsuperscript{3} Institute of Immunology and Immunotherapy, University of Birmingham, UK

**Funding acknowledgements and Disclaimer:**

NIHR funding support must be acknowledged in publications and the NIHR disclaimer included. Please include the following in your submission:

*This paper presents independent research funded (or supported) by the NIHR Birmingham Biomedical Research Centre at the University Hospitals Birmingham NHS Foundation Trust and the University of Birmingham. The views expressed are those of the author(s) and not necessarily those of the NHS, the NIHR or the Department of Health and Social Care.*

For author affiliations please ensure you include **UHB and UoB as well as NIHR** in all publications.

For publications where funder(s) other than the NIHR are involved and you need to acknowledge the NIHR and other funders, then Option 5 of the publication tool allows you to add additional funders. Note: you will need to manually add acknowledgement details for other funders who have funded or supported your research.

**EME funded projects only**

For projects funded by the EME (jointly funded by the MRC and NIHR), you can still use the BRC publication tool (see sample affiliation below):

**Author affiliations**

Please include all the following author and related affiliations:

Briscoe, LA\textsuperscript{1, 2, 3}

\textsuperscript{1} NIHR Birmingham Biomedical Research Centre, University Hospitals Birmingham NHS Foundation Trust, UK and University of Birmingham
\textsuperscript{2} University Hospitals Birmingham NHS Foundation Trust, UK
\textsuperscript{3} Institute of Immunology and Immunotherapy, University of Birmingham, UK

**Funding acknowledgements and Disclaimer:**

As EME is jointly funded by the MRC and the NIHR, **EME research projects must instead** use the following:

*Acknowledgement*

This project is funded by the Efficacy and Mechanism Evaluation (EME) Programme, an MRC and NIHR
partnership and supported by the NIHR Birmingham Biomedical Research Centre at the University Hospitals Birmingham NHS Foundation Trust and the University of Birmingham.

Disclaimer
The views expressed in this publication are those of the author(s) and not necessarily those of the MRC, NHS, NIHR or the Department of Health and Social Care. The EME Programme is funded by the MRC and NIHR, with contributions from the CSO in Scotland and NISCHR in Wales and the HSC R&D Division, Public Health Agency in Northern Ireland.

Further details of acknowledgement text and requirements for EME programmes can be found at: https://www.nihr.ac.uk/funding-and-support/funding-for-research-studies/manage-my-study/study-outputs-and-branding.htm

Study outputs and branding
The NIHR encourage you to use the NIHR logotype, where permitted. You can also use your own project logo on outputs. You can find out how to do this in their identity guidelines.

NIHR logotype:

What is an output?
An output is any item arising from NIHR-funded research that enters the public domain. Outputs can be written, audio/visual, electronic or verbally presented. The NIHR takes a broad definition of what constitutes an output. These might include but are not limited to:

- written outputs such as press releases, research reports, journal articles, abstracts, presentation slides, posters, websites, books or book chapters, blogs and other forms of social media, newsletters
- presentations, speaking at events or in the media including media interviews
- software/algorithms
- training materials such as manuals or DVDs
- checklists, scales, protocols, questionnaires, toolkits
- service guidelines or similar
- service innovations or new service delivery models
- research tools such as data analysis techniques, assays, cell lines, antibodies, biomarkers
- patentable inventions such as new therapeutic products, equipment, diagnostic test or medical devices
- participant materials.

Detailed information is included in the NIHR identity guidelines, particularly Chapters 10 and 14.

Tracking outputs
The NIHR are required to track outputs throughout your project's progress and for three years (for those studies with contracts issued prior to April 2012) to five years (for contracts issued after April 2012) after publication of the final report. As well as allowing the Department of Health and Social Care to prepare an informed response in case of media or political interest, it keeps us informed of the reach of your findings and their impact and helps our own communications work.

Please also acknowledge any other NIHR support the study may have received such as through the Clinical Research Network or a Clinical Research Facility. This is applicable to publications too.

For full details about NIHR study outputs and branding, please go to: https://www.nihr.ac.uk/funding-and-support/funding-for-research-studies/manage-my-study/study-outputs-and-branding.htm

ORCID Ids (Open Researcher and Contributor ID)
The NIHR mandate the use of ORCID IDs on publications and as part of their funding applications. Details are reported to the NIHR as part of the annual reporting process. In addition, all research active staff within the
University are required to have an ORCID ID. Further information about the University's policy can be found at https://intranet.birmingham.ac.uk/collaboration/pure/using-pure/ORCiD.aspx.

An ORCID ID is a unique and persistent identifier which is platform agnostic (i.e. works on shared platforms). You can create an ORCID ID through PURE and you can link your ORCID to PURE so that publications are automatically pulled through. Once you have an account in PURE there is a link there to create an ORCID ID: https://intranet.birmingham.ac.uk/collaboration/pure/documents/public/Creating-an-ORCiD-2.pdf

1. Create your ORCID in Pure
2. Import your research outputs and add biographical information using our automated import wizards (soon you will be able to push your research outputs from Pure to ORCID)
3. Use your ORCID when you apply for grants, submit publications, or share your CV. Alternatively to create an ORCID, go to https://orcid.org/ and follow the instructions below.

If you use Crossref and you supply your ORCID ID, your publications will automatically push through the relevant publication details to your record.

Information about Open Access (NIHR requirements and University requirements) can be found on the BRC website using the link below and navigating to the Staff area of the webpage.

https://www.birminghambrc.nihr.ac.uk/staff/nihr-policy-on-open-access/

REMEMBER!! The BRC website contains information on authorship responsibilities, NIHR Identity Guidelines and the BRC acknowledgement tool:
